

The Quaderra Group specializes in the placement of technical and executive professionals in the energy and resource industries within Canada and around the globe. We utilize an innovative and proactive approach to reveal hidden talent to our clients and well-matched opportunities for our candidates. Our priority is to maximize the fit between companies and candidates. We look for the right fit – beyond the resume. This means we focus on getting to know YOU. This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C09207

JOB TITLE: Intermediate Exploitation Engineer

POSITION LOCATION: Calgary

OPERATING AREA: Saskatchewan and Alberta

Our Client:

Our medium size client is a conventional oil and natural gas E&P with assets strategically focused in properties comprised of high quality, long life, operated light oil and natural gas reserves in Western Canada. Our client strives to create sustainable, value added growth in reserves, production, and cash flow through the execution of management's integrated strategy of acquiring, exploiting and developing reserves in the Western Canada Sedimentary Basin.

Reporting Structure: Manager of Exploitation Engineering

Responsibilities/Accountabilities:

The Exploitation Engineer is responsible for all activities related to growing and maximizing the value of company assets. In addition to this, the Exploitation Engineer will assist with a hands-on, multi-disciplinary, business minded team of geology, geophysics, finance/accounting, land and field staff who foster an upbeat and driven work environment.

- Implementation of company strategy within the corporate business plan.
- Identify and develop exploitation opportunities and reservoir depletion strategies. Focus on increasing recovery factors through infill drilling, water flood optimization and improved technology.
- Recommend/implement area development plans leading to appropriate capital spending. Lead team members to deliver on areas of reserves and production rate additions.
- Work closely with field staff to optimize existing production and to coordinate certain operations activities.

- Maintain accurate company reserve bookings for assigned areas and perform as the company representative to independent reserve evaluators.
- Perform technical and economic evaluations of assets for acquisition with a focus on high quality, large resource in place pools with production and reserves upside.

Skills/Qualifications:

- University Degree in Engineering and a member of APEGGA.
- **Minimum 3 to MAXIMUM 7 years of oil and gas** industry engineering experience is required.
- Strong exploitation and evaluations skills are required.
- Software skills to include: well & reservoir analysis and petroleum economics (proficiency with OFM and PEEP would be an asset), Accumap, Excel, Word, FieldView.

Compensation/Remuneration:

Competitive base salary with bonus, options and health benefits.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C09207 and the title in the subject line. Thank you.
