

The Quaderra Group specializes in the placement of technical and executive professionals in the energy and resource industries within Canada and around the globe. We utilize an innovative and proactive approach to reveal hidden talent to our clients and well-matched opportunities for our candidates. Our priority is to maximize the fit between companies and candidates. We look for the right fit – beyond the resume. This means we focus on getting to know YOU. This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C10218

JOB TITLE: Operations Technologist/Engineer 2X

POSITION LOCATION: Saskatchewan 2 Locations

OPERATING AREA: Saskatchewan

Our Client:

Our medium size client is a conventional oil and natural gas income trust with assets strategically focused in properties comprised of high quality, long life, operated light oil and natural gas reserves in Western Canada. Our client strives to create sustainable, value added growth in reserves, production, and cash flow through the execution of management's integrated strategy of acquiring, exploiting and developing reserves in the Western Canada Sedimentary Basin.

Reporting Structure: Manager of Engineering

Responsibilities/Accountabilities:

The Operations Engineer/Engineering Technologist will be responsible for providing support for capital development projects, recommending and executing production optimization opportunities as well as providing other technical support as needed. The successful candidate will work closely with both the Calgary based engineering teams and the field based development and operations teams. Work with Calgary based engineers and field based development teams to ensure wells are on production and tied in as soon as possible after drilling and completion

- Identify facility/pipeline requirements for current and future capital development and work with Calgary based engineers to define project scopes
- Participate in the commissioning and the start-up of capital projects as needed
- Lead production optimization activities including facility optimization/rationalization and other operating cost reduction initiatives
- Identify production reactivation candidates and prepare detailed economics to support these projects
- Facilitate maintenance of appropriate site documentation
- Provide technical support by implementing best operating practices

Skills/Qualifications:

- Bachelor's degree in Engineering or nationally accredited two year Engineering Technology diploma
- New graduate to three years of relevant experience
- Strong team player with excellent interpersonal and communication skills
- Experience in the Canadian upstream oil and gas industry including capital project planning and execution would be an asset
- Excellent computer skills with proficiency in: Microsoft Office applications, Accumap, AFE Navigator, Peep/Value Navigator
- Experience of working with best operating practices would be an asset
- Strong technical skills with the ability to work at both the field and corporate level
- Comfortable making presentations and facilitating meetings

Compensation/Remuneration:

They offer a competitive salary, with options, benefits and an exceptional work environment.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C10218 in the subject line. Thank you.
