This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C10220

JOB TITLE: Development Engineer – Local Gas Supply, GHG Strategy

POSITION LOCATION: Calgary, AB

OPERATING AREA: Oil sands

Our Client:

Our client is a well financed oil & gas company based in Calgary with its principal assets and interests being within the oil sands in Northern Alberta.

The successful candidate will work as a member of a multi-disciplinary team focused on the design, construction and implementation of the company's gas supply and emissions management strategies and projects.

Reporting Structure:

This position will report to the Manager, Gas Supply / Emissions Management.

Responsibilities/Accountabilities:

- Provide and demonstrate personal Safety leadership in accordance with the company's EHS program. Provide leadership in establishing a strong Safety culture within the organization, vendors, service providers and the contractors.
- Project management to design and develop Green House Gas (GHG) related initiatives and field pilots.
- Develop project proposals in conjunction with the team for senior management approval.
- Actively seek out and identify energy efficiency/product recovery best practices, new technologies, etc.
- Support modeling, forecasting and reporting of GHG emissions and government regulations.

- Project management of local gas development. Coordinator the planning and logistics necessary to implement the installation of the wells and facilities incorporating the needs of all disciplines.
- Develop and evaluate strategic natural gas acquisitions and divestments.
- Manage specific capital and operating budgets.

Skills/Qualifications:

- PEng. with 5 to 10 years of oil and gas experience preferred.
- Experience in facility design, engineering principles, operations and economic analysis.
- Knowledge of emerging GHG regulations and accounting principles.
- Ability to travel to field locations.
- Ability to utilize organization tools maintaining progress on multiple long term tasks, while effectively handling day-to-day issues.
- Strong analytical, problem solving, and computer skills.
- Strong communication and interpersonal skills.
- Ability to excel within a fast-paced, dynamic team environment.

Compensation/Remuneration:

Competitive base salary, bonus, stock options, and competitive benefits package.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C10220 in the subject line. Thank you.
