This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C10224

JOB TITLE: Business Unit Manager, Shallow Gas

POSITION LOCATION: Calgary, AB

OPERATING AREA: Central Alberta

Our Client:

Our client is a publicly traded oil and gas company engaged in the exploration, acquisition, development and production of oil and natural gas in Western Canada. The company's principle property is in Central Alberta. The company's development strategy is focused on shallow gas and Cardium light oil. Current production is approximately 7500 BOED with a 2010 production guidance of 10,000 BOED. Currently, the company is weighted approximately 85% gas and 15% oil and NGLs. The company is seeking a Business Unit Manager to lead their shallow gas team.

Reporting Structure:

This role reports directly to the Chief Operating Officer.

Responsibilities/Accountabilities:

The Business Unit Manager will be responsible for leading the Shallow Gas team, including a geologist, geophysicist, exploitation engineers and a production engineer. This is a new growth position so there is a unique opportunity to play a significant role in BU strategy and planning the drilling program. This individual will be responsible for ensuring the company's interests are protected and enhanced through optimizing production and minimizing associated costs in a safe and environmentally sensitive manner. Responsibilities include:

- Provide direction and leadership to employees
- Provide strategic and technical direction to the BU
- Ensure maximum production and minimum operating expenses are achieved

- Participate in the ongoing development of health and safety environmental plans
- Act as a technical resource providing input on potential property acquisitions and divestitures
- Complete annual budget for the business unit and set production targets
- Direct government compliance to ensure that all obligations in regard to Business Unit operations are handled
- Work in a team environment focused on coordinating activities with other departments including Production, Facilities, Drilling & Completions, Land and Accounting

Skills/Qualifications:

- P.Eng. with at least 15 years experience in exploitation/reservoir and production engineering
- Sound working knowledge of geology, joint ventures and regulatory compliance are required
- Demonstrated success managing resources (people & capital) in a relevant leadership role
- Self-motivated individual with the ability to lead and mentor a younger team of professionals
- Experience working in a fast-paced environment with the ability to process a large quantity of data, as the company is bringing on 2-3 wells per day.

Compensation/Remuneration:

Our client offers a fast-paced, team-oriented and individually rewarding work environment and a competitive compensation package, including generous option grants, bonus, and employee savings plan.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C10224 in the subject line. Thank you.
