

The Quaderra Group specializes in the placement of technical and executive professionals in the energy and resource industries within Canada and around the globe. We utilize an innovative and proactive approach to reveal hidden talent to our clients and well-matched opportunities for our candidates. Our priority is to maximize the fit between companies and candidates. We look for the right fit – beyond the resume. This means we focus on getting to know YOU. This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C10268

JOB TITLE: Lead Reservoir Engineer

POSITION LOCATION: Calgary, AB

Our Client:

Our client is an integrated international energy company primarily focused on upstream oil and gas operations. The organization is involved in oil sands and offshore projects within Canada.

The Lead Reservoir Engineer acts as the local reservoir process manager for the oil sands assets. This position advises on reservoir activities across the assets with a view to improving the performance of the in situ developments. There is a strong integrated interface with the other disciplines including Geology, Geophysics, Production and Facilities in addition to working across assets and with corporate process owners/Principal Engineers.

Reporting Structure:

This position reports to the Discipline Lead Manager, Full Field Development.

Responsibilities/Accountabilities:

- Secures technical alignment across all petroleum technology teams as key advisor on discipline best practice.
- Coordinates cross organizational tasks/studies.
- Integral member of the QA/QC team.
- Champions implementation of appropriate work processes and use of new technologies to ensure a high quality of reservoir engineering and SAGD acumen.
- Leads local discipline network and is active in the corporate network
- Identifies and initiates competence improvement tasks

- Provides Reservoir Engineering technical advice and specialized project support to the Asset teams in liaison with technical specialists
- Leads technical workshops to increase general SAGD acumen and reservoir engineering principles

Skills/Qualifications:

- Master of Science in Engineering preferred.
- APEGGA Member.
- A minimum of 15 years of related Reservoir Engineering industry experience is required including a minimum of 10 years in SAGD/oil sands.
- Prior management experience and/or training.
- Well rounded business acumen with high standards, business ethics, and leadership.
- Demonstrated operational in-situ experience, specifically SAGD.
- Strong mentorship.
- Occasional travel and future relocation possibilities.

Compensation/Remuneration:

Compensation includes a competitive salary, short term performance bonus, long term incentive program, savings and pension plan, vacation, personal days off, comprehensive health benefits, and personal allowance.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C10268 in the subject line. Thank you.
