This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C10270

JOB TITLE: Engineer – Regulatory & External Relations

POSITION LOCATION: Calgary, AB

Our Client:

Our client is a Canadian headquartered natural gas producer with resource plays in Canada and the United States. The organization is focused on delivering steady, reliable gas production over the long term to generate company value.

The company has an excellent opportunity for a professional engineer to work on strategic projects within the Regulatory & External Relations team. The successful candidate will utilize technical and general problem solving skills in handling a variety of significant impact projects pertaining to royalty programs, fiscal improvements and regulatory refinements across multiple jurisdictions. The small team creates the opportunity for significant exposure, communication development and mentoring, as well as the opportunity to make contacts throughout the company, Industry and Government. This role will appeal to those individuals who are highly motivated and constantly seeking a challenge, applying broad conceptual approaches (based in solid technical and operational understanding) while gaining experience with a broad range of disciplines in the policy development sphere.

Reports to: Group Lead, Regulatory & External Relations.

Responsibilities/Accountabilities:

- Work closely with the Company staff (including operating Business Unit staff and management) as well as industry (via CAPP and CSUG) and government stakeholders (ERCB, OGC, Ministry of Energy) on policy matters including strategic initiatives such as targeted royalty programs, large scale infrastructure development programs, Greenhouse Gas policy.

- Work closely with the Company staff and industry on matters that impact regulatory refinements (including diverse assignments such as wellbore commingling regulations, shale gas regulation development, CBM regulations and other miscellaneous operational regulations).
- Project work involves technical analysis grounded in development engineering principles.
- Support Government and External relations interactions including preparation of material required for presentations by Senior Management to Government and external stakeholders, etc.
- Provide mentorship and guidance to junior staff as required.

Skills/Qualifications:

- Degree in engineering, preferably with a concentration in Chemical, Mechanical, or Petroleum, with 5 - 10 years of engineering experience within the oil & gas industry.
- Experience in the following areas is preferred: development engineering, type curve methodology, Accumap and PEEP
- Motivated self-starter who shows initiative.
- Demonstrated ability to work independently and collaboratively within a team
- Well developed communication and interpersonal skills
- Ability to develop relationships and work with a variety of stakeholders (internal and external).
- Interest in influencing and seeking improvements for the oil and gas industry.

Compensation/Remuneration:

Compensation includes competitive base salary, performance bonus, long term incentives, savings plan, company pension, flexible benefits program and coverage, perq. allowance, and excellent vacation and flex/work schedule.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C10270 in the subject line. Thank you.
