Our priority is to maximize the fit between companies and candidates. We look for the right fit – beyond the resume. This means we focus on getting to know YOU. This includes not only your skill set, but understanding what’s important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C10279

JOB TITLE: Senior Geologist

POSITION LOCATION: Calgary, AB

OPERATIONS AREAS: Northern Alberta, Oil sands

Our Client:

Our client is a well financed company based in Calgary with its principal assets being within the oil sands in Northern Alberta. The company has current production of approximately 25,000 bbls/day and is continuing to work towards further expansion and growth of the projects and company.

The company is seeking an experienced Geologist. The purpose of this position will be to contribute to the success of the company’s SAGD projects by providing technical expertise in the area of Geological Sciences. As a key member of the Geology Team, you will use your expertise to support the company’s growth efforts in both oil sands and natural gas exploration and development.

Reports to:

This position reports to the Manager, Geology.

Responsibilities/Accountabilities:

- Prepare development plans for selected oil sands properties including core hole delineation and SAGD planning.
- Supervise and provide technical support for core hole delineation programs and horizontal well drilling.
- Provide input for capital and operating budgets.
- Preparation of Regulatory applications and updates.
- Support and mentor staff across the organization.
- Evaluate exploration and acquisition opportunities.

- Conduct geological evaluations for land sales, expiries, continuations, farm-in, farm-outs and acquisitions for petroleum and natural gas over the company's areas of interest.

Qualifications:

- Degree in Geology.
- Registered Professional Geologist or eligible for with APEGGA.
- Minimum 10 years of geological experience, including 5 or more years in driving development of a thermal horizontal well project in the oil sands of Alberta.
- Strong analytical, problem solving, communication and interpersonal skills.
- Familiar with Geoscout and Petra geological software. Proficient in the use of Microsoft Office.
- Broad knowledge of seismic, petrophysics, and reservoir engineering.
- A demonstrated ability to work in a team environment and positive influencing behaviors are required.
- Ability to multitask in a fast paced working environment.

Compensation/Remuneration:

Compensation includes a competitive base salary, performance bonus, long term incentives, benefits, savings plan contribution, and generous vacation and flex schedule.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job **ID #C10278** in the subject line. Thank you.
