**JOB ID #: C10280**

**JOB TITLE: Senior Exploration Geologist – East Coast**

**POSITION LOCATION: Calgary, AB**

**Our Client:**

Our client is an integrated international energy company primarily focused on upstream oil and gas operations. The organization is involved in oil sands and offshore projects within Canada. The current east coast exploration portfolio consists of 3 operated exploration licenses, and 2 operated discoveries. The organization is also a 50% partner in 2 exploration licenses and other working interests. Due to organic growth, new exploration wells are planned for drilling in 2011 and 2012. Additionally, there will be participating in annual land sales in order to replenish and grow the exploration portfolio.

The organization is seeking a Senior Exploration Geologist, working with the Exploration Team to provide geological expertise in the assessment of East Coast exploration opportunities, leading to prospect evaluations and development opportunities. This position is based in the Calgary office.

**Reporting Structure:**

This position reports to the Vice President, Exploration.

**Responsibilities/Accountabilities:**

- Providing geological expertise to support the technical evaluation of investment opportunities (land sales, exploration wells, and farm-ins)
- Identifying, assessing and recommending action on opportunities from a geological perspective
- Providing technical support in planning and follow-up of well operations

- Providing geological technical expertise and leadership with respect to current technologies (e.g., LandMark, Petrel, RMS) that would apply and be pertinent to the evaluation of opportunities
- Continuously maintaining a leading edge position with respect to current technologies that apply to exploration and development
- Actively participating in the creation of a team environment consisting of highly motivated professionals and develop the geological competence within the team
- Represent the company and participate in work in designated license committees

### **Skills/Qualifications:**

- MSc. in Geology and APEGGA member.
- Minimum of 10 years industry experience, preferably with experience in offshore exploration.
- Familiarity with all aspects of the exploration cycle.
- Demonstrated success in being part of a team that fully integrates geology, geophysics and engineering.
- Strong understanding of prospect volumetric and risk evaluation and operations expertise.
- Excellent knowledge of modern geological work processes.
- Seismic interpretational skills would be an asset.
- Capable of dealing with large and varied digital data sets.
- Strong interpersonal and communication skills, and fluent in English.
- Independent work ethic and at the same time, ability to be a strong team player with a “hands on” attitude to cooperate effectively in a matrix organization.
- Flexible mindset.
- Ability to draw conclusions with focus on critical success factors.
- Structural expertise and experience from rift basins, specifically East Coast Canada, is an asset.
- Be proactive and perform work in a structured and systematic way.

### **Compensation/Remuneration:**

Compensation includes a competitive salary, short term performance bonus, long term incentive program, savings and pension plan, vacation, personal days off, comprehensive health benefits, and personal allowance.

**How to Apply:** If you are interested in this position, please submit your resume in Word or .RTF format to [info@quaderra.com](mailto:info@quaderra.com) including job ID #C10280 in the subject line. Thank you.
