Our priority is to maximize the fit between companies and candidates. We look for the right fit – beyond the resume. This means we focus on getting to know YOU. This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C11480

JOB TITLE: Team Lead, Process Safety and Integrity Data

POSITION LOCATION: Calgary, AB

OPERATING AREA: North America – Shale Gas

Our Client:

Our client, a globally diverse oil and gas producer, headquartered in Calgary is focused on a path to safe positive growth for the long term in Canada and internationally.

This role will report to the Manager, Operational Integrity for our client's North American Operations and will lead a diverse team of technical staff in the Calgary office. This role will be responsible for setting a clear direction for the team so they can build and maintain process safety programs for NAO's assets associated with wells and facilities and provide support for integrity data used by the team and within NAO.

Responsibilities/Accountabilities:

- Direct, liaise and work closely with a team of cross functional NAO employees.
- Develop strong relationships with senior management within NAO and our client's main office as well as other key internal and external partners.
- Ensure company and team goals are clear, measurable and communicated to each team member.
- Put consistent, fit for purpose practices, procedures, processes, and programs in place to identify hazards and assess and manage risks associated with their operations.
- Provide process safety expertise throughout the life cycle of their assets.
- Investigate, analyze, trend and share learning's from process safety incidents at NAO operations to minimize reoccurrence.
- Identify opportunities to improve process safety performance.
- Ensure NAO integrity data is well managed and provides value to end users.

Skills/Qualifications:

- A degree with an Engineering focus.
- Leadership
- 10 - 15 years' experience in operations and or engineering including exposure to integrity programs, asset inspections and incident investigation.
- A solid understanding of Process Safety as well as Behaviour Based Safety.
- A working understanding of facility operations and processes.
- Knowledge of design codes (ex. ASME, CSA, API).
- Experience in process hazard assessment.
- Experience in root cause analysis is an asset.
- Analytical thinking and problem solving.
- Data manipulation and analysis.
- Strong computer skills, including use of the Microsoft Office suite of products.
- Proactively initiate discussions and identify issues as well as the ability to facilitate resolutions in a practical manner.
- Attention to detail.
- Strong written and verbal communication skills.

Compensation/Remuneration:

Compensation includes competitive base salary, performance bonus, long term incentives, savings plan, company pension, flexible benefits program and coverage. Allowance, and excellent vacation and flex/work schedule.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C11480 in the subject line. Thank you.
