

The Quaderra Group specializes in the placement of technical and executive professionals in the energy and resource industries within Canada and around the globe. We utilize an innovative and proactive approach to reveal hidden talent to our clients and well-matched opportunities for our candidates. Our priority is to maximize the fit between companies and candidates. We look for the right fit – beyond the resume. This means we focus on getting to know YOU. This includes not only your skill set, but understanding what's important to you to help determine what you really want. We work for you – your satisfaction is our success.

JOB ID #: C12490

JOB TITLE: Electrical Lead Engineer

POSITION LOCATION: Calgary, AB

OPERATING AREA: Northern Alberta - Oil Sands

Our Client:

Our client is an integrated technology-based international energy company primarily focused on upstream oil and gas operations. The organization is involved in oil sands and offshore projects within Canada. It holds its upstream oil sands operating and development assets in a partnership with another international E&P company.

As a member of a multidisciplinary project team this position will be responsible for coordinating technical and design activities related to a new SAGD project along with supporting procurement and field activities associated with fabrication, construction and commissioning of the facility.

Reports to:

Director, Engineering, Construction & Completion (Resource Manager) and Project Manager (Day to Day Activities).

Responsibilities/Accountabilities:

- Applying Company and project specific HSE policies and related standards.
- Electrical lead for all modifications including feasibility studies, design concept and selection, milestone schedules, cost profiles, development plan and risk analyses
- Procure electrical engineering contractors to execute the various works for the modifications projects.
- Electrical technical support and input to the design, construction, and quality control of new facilities and modifications
- Reviewing engineering and design deliverables from contractors and vendors.
- Participating in studies, document reviews and technical bid evaluations.
- Interacting with multiple stakeholders and team members internally and externally, including asset owner, engineering, procurement, and construction, to ensure stakeholders contribute to and buy-in to plans and decisions.

- Integrate all electrical engineering activities of the modification project.
- Ensuring regulatory compliance is met in the delivery of projects
- Ensuring contractor's engineering and project deliverables meet Company requirements
- Working with document management and lifecycle information (LCI)

Skills/Qualifications:

- An Electrical Engineering degree recognized by APEGGA
- More than 10 years of related experience in electrical engineering preferably in SAGD projects in Alberta.
- Familiar with the Canadian Electrical Code.
- Well-developed analytical, communication, and interpersonal skills
- High focus on HSE, ethics
- Ability to work in a fast-paced and rapidly changing environment
- Strong team orientation, demonstrating a high level of cooperation
- Structured, systematic and target driven with well-defined goals
- Highly motivated, results oriented and able to manage multiple tasks, interfaces, and delivery dates
- Able to challenge and accept new approaches that has added value to the project and team.

Compensation/Remuneration:

Compensation includes competitive base salary, bonus, long term incentive, pension and savings programs, vacation, personal days off, personal allowance and benefits coverage.

How to Apply: If you are interested in this position, please submit your resume in Word or .RTF format to info@quaderra.com including job ID #C12490 in the subject line. Thank you.
